Some of the key questions answered by this report include:

• How will shipments of aircraft seats grow between 2018 and 2028? How will associated revenues grow over the same time period?
• What is the current and future size of the market for AC, USB and AC+USB combination in-seat power whether integrated into IFE or not?
• How do the aircraft seating and in-seat power markets break down by product type, fitment type, cabin class, aircraft type and region?
• How will disruptive technologies and new, lightweight materials affect seat design?
• To what extent will changing aircraft mission statements and the emergence of IFC/W-IFE raise demand for in-seat power on single-aisle aircraft?
• What is the use case for Type-C with USB Power Delivery in economy class?
• What does the future of inductive charging look like in different cabins?
• Is there a significant enough commercial incentive for airlines to upgrade the passenger experience in economy cabins?
• What are the market shares of leading seat makers and in-seat power vendors?
• Who are the new and established players and what are the features, functionalities and capabilities of their offerings?
• How are OEMs diversifying their supply chains to reduce risk and encourage competition?
• What are the key drivers and inhibitors of market growth? What are the main technological developments taking place?
OVERVIEW

The “Future of Aircraft Seating and In-Seat Power” is a new two-part report from Valour Consultancy that sits within the firm’s highly-regarded aviation portfolio of research. Based on a period of twelve months’ research and developed with input from more than 30 companies from across the value chain, this study provides an unprecedented view of the markets for aircraft seating and in-seat power.

Alongside a lengthy discussion of key drivers and inhibitors of market growth, this report quantifies seating and in-seat power system shipments, installed base and revenues in 2017 and 2018 and provides a ten-year forecast out to 2028. Data is segmented by product type, fitment type, aircraft type, cabin class and geographic region, with a full qualitative discussion of the key trends at play in support of this. In-depth company profiles of major players are also included, along with their respective revenue market shares.

MARKET BREAKDOWN

- Installed base
- Penetration
- Annual deliveries
- Annual revenues
- ASPs

IN-SEAT POWER
- Single-aisle market
- Twin-aisle market

FITMENT TYPE
- Retrofit
- Line fitment

SEATING
- International first class
- Business class
- Premium economy class
- Economy class

PRODUCT TYPE
- 110V AC
- IFE-integrated USB
- AC+USB combo
- Standalone USB

AIRCRAFT TYPE
- Narrow-body
- Wide-body
- Regional aircraft

CABIN CLASS
- International first class
- Business class
- Premium economy class
- Economy class

GEOGRAPHY
- Africa
- Asia-Pacific
- Central & Eastern Europe
- Central & South America
- Middle East
- North America
- Western Europe

MARKET SHARES
- Seat manufacturers
- In-seat power vendors

WHAT YOU RECEIVE – KEY POINTS

- 184 pages of quantitative and qualitative analysis giving rich insight
- 2 reports for the price of 1 – aircraft seating AND in-seat power
- Double base year (2017 and 2018) and forecasts to 2028, alongside robust justifications
- Short but revealing survey on airline attitudes to in-seat power
- Full overview of the competitive environment and market trends
- 34 in-depth profiles of key companies involved in seating and in-seat power
- Dedicated analyst time from the author to answer questions you have on the study
- PDF report and Excel tables, plus an invite to an exclusive summary webinar

EXECUTIVE SUMMARY

CHAPTER 1 – SCOPE, DEFINITIONS & METHODOLOGY
1.1 Introduction
1.2 Scope and Definitions
1.3 Report Content
1.4 Data Collection Methods and Sources
1.5 Exchange Rates

CHAPTER 2 – TECHNOLOGY OVERVIEW
2.1 Introduction
2.2.1 New Cabin Classes
2.2.2 USB Power Standards
2.2.3 Next-Generation Materials
2.2.4 PED Holders
2.2.5 Reclining Seats versus Fixed-Back Seats
2.2.6 3D Body-Scanning
2.2.7 Safety and Performance Simulation/Prototyping Tools
2.2.8 3D Body-Scanning
2.2.9 Lack of Standards
2.2.10 Cost of Testing
2.2.11 Future Proofing Designs
2.2.12 Line-fit Offerability and Certification Issues
2.2.13 Changing Aircraft Mission Statements
2.2.14 Prospect of Heightened Aftermarket Activity
2.2.15 Increased Aircraft Production
2.2.16 Use of Lightweight Materials
2.2.17 Improving and Measuring Perception of Comfort
2.2.18 Optimising Seat & Component Design for Reliability & Maintainability
2.2.19 Integrating New, Lightweight, and Cost-Effective IFE Solutions
2.2.20 Personalised Seating
2.2.21 USB Type-C in Consumer Electronics
2.2.22 “You Get What You Pay For”
2.2.23 “Death of First Class?”
2.2.24 “You Get What You Pay For”
2.2.25 Increasingly Cramped Seating Conditions
2.2.26 Supply Chain Constraints
2.2.27 Maintenance Issues
2.2.28 Changing Morphology of Passengers
2.2.29 Lack of Standards
2.2.30 Cost of Testing
2.2.31 Future Proofing Designs
2.2.32 Line-fit Offerability and Certification Issues
2.2.33 Airlines are Risk Averse
2.2.34 Death of First Class?
2.2.35 Moving from Type-A to Type-C
2.2.36 Safety and Performance Simulation/Prototyping Tools
2.2.37 Inductive Charging
2.2.38 USB Connector Types
2.2.39 ARINC Standards and Line-Fit Requirements

CHAPTER 3 – MARKET STATISTICS AND TRENDS
3.1 Introduction
3.2 Aircraft Seating Market
3.2.1 Market Drivers
3.2.1.1 Increased Aircraft Production
3.2.1.2 Prospect of Heightened Aftermarket Activity
3.2.1.3 Changing Aircraft Mission Statements
3.2.1.4 Personalised Seating
3.2.1.5 Use of Lightweight Materials
3.2.1.6 Falling Prices
3.2.1.7 Integration of Power into Seat Design
3.2.1.8 Lighter, Less Obtrusive and Less Expensive Equipment
3.2.1.9 USB Power Delivery and Type-C Specifications
3.2.1.9.1 USB Type-C in Consumer Electronics
3.2.1.10 Inductive Charging
3.2.1.11 Future Proofing Designs
3.2.2 Market Inhibitors
3.2.2.1 Line-fit Offerability and Certification Issues
3.2.2.2 Upfront Costs
3.2.2.3 Moving from Type-A to Type-C
3.2.2.4 “You Get What You Pay For”
3.2.2.5 “Death of First Class?”
3.2.2.6 Airlines are Risk Averse
3.2.2.7 Changing Morphology of Passengers
3.2.2.8 USB Type-C in Consumer Electronics
3.2.2.9 Lack of Standards
3.2.2.10 Cost of Testing
3.2.2.11 Future Proofing Designs
3.2.2.12 Line-fit Offerability and Certification Issues
3.2.2.13 Airlines are Risk Averse
3.2.2.14 Death of First Class?
3.2.2.15 Moving from Type-A to Type-C
3.2.2.16 Safety and Performance Simulation/Prototyping Tools
3.2.2.17 Inductive Charging
3.2.2.18 USB Connector Types
3.2.2.19 ARINC Standards and Line-Fit Requirements

Valour Consultancy is a UK-based provider of market intelligence services. Founded in 2012, the company has grown rapidly and is renowned for the extremely high-quality of its research and consultancy. Having firmly established itself in the aviation space, where many of the leading players rely on its expert insight and analysis, Valour Consultancy has successfully expanded into a number of other markets including, maritime, industrial, drones and body-worn cameras.

The company’s aim is to deliver solutions that deliver real value and it continues to operate with the three core values it was founded on – Honesty, Trust and Time. As a result, Valour Consultancy continues to build long-lasting relationships.

What we offer:

- Syndicated research reports
- Custom research and consulting
- Whitepapers
- Survey design and analysis
- Databases and tracker products
- Public speaking, panel discussions and webinars

Please feel free to visit our website or email us for more information.
